How Painful! Knowledge of pain and pain Medications in the General Public

Details of the Study

This project is being undertaken as part of an immersive research experience for a pharmacy honours student, Michael Arao-Arao. The purpose of this project is to investigate the general public's experience with migraine pain, specifically your understanding and knowledge of migraine pain, how your migraine pain is managed and migraine pain medicines generally. The research team requests your assistance because as a member of the general public who has a migraine pain experience, your opinions on migraine pain and its management will help us design education resources that can be made available to the public.

Start and end date

June 2018 to November 2018

Volunteer Criteria

Members of the Australian general public who suffer from migraines (of any type) and are more than 18 years of age.

Participation Requirements

Participation involves completing an anonymous online survey, which will take approximately 15 minutes.

Questions may include: a) How long have you been experiencing migraine pain for? and b) What medications do you use to alleviate the symptoms of a migraine?

Participation in this project is entirely voluntary. If you agree to participate you do not have to complete any question(s) you are uncomfortable answering and you can withdraw at any time, however as the submission is anonymous, once you have submitted your survey it will not be possible to withdraw.

Ethics Approval

This project has been approved by the Queensland University of Technology Human Research Ethics Committee (QUT approval number 1500001119).

Contact Information
