

INVITATION TO

PARTICIPATE IN RESEARCH ABOUT MIGRAINE

Tell us what's important to you

Community and Patient Preference Research (CaPPRe), an independent research organisation is conducting research with people who have been diagnosed with migraine.

Your participation is valuable in exploring the issues facing people living with migraine. This information helps improve the understanding of the relative importance of different treatment features to people living with migraines. You will receive payment for your time and contribution to this research.

The study is sponsored by a pharmaceutical company.

Who can participate?

We are looking for adults who have been diagnosed with migraine in Australia.

What's involved?

Eligible participants can complete the 20-25-minute online survey on their computer or tablet device.

Interested?

To start the survey, please [click here](#).

If you would like more information about this study, please do not hesitate to contact Samson Kong samson.kong@cappre.com.au
